

# CASP

## Learn to live

We want CASP to prepare students for life outside of school; for students to be inspired by the issues of the community and world around them, to be increasingly aware and knowledgeable of those issues and to develop a passion to affect those issues. Students will have opportunities to learn about the possibilities for their future, to aspire to higher goals and to understand the pathways to get there. Furthermore students will have opportunities to develop social skills, personal skills and learn how to get the best out of the opportunities that they can create.
